

Universal Electronics and SpeakerCraft Deliver Seamless A/V Device Control and Digital Media Playback

March 6, 2007

Universal Electronics Announces Seamless Integration of its NevoSL(TM) With the SpeakerCraft MODE Jukebox Music Server

CYPRESS, Calif., Mar 06, 2007 (BUSINESS WIRE) -- Leading wireless technology developer Universal Electronics Inc. (UEI) (NASDAQ: UEIC) today announced that its innovative NevoSL, a universal controller that intuitively delivers complete A/V and digital media control for the networked home, and the SpeakerCraft MODE Jukebox music server now offer seamless integration. Consumers can access all MODE Jukebox music files and control its functions while albums, art images and other information are displayed on the NevoSL screen.

The integration of NevoSL with other home digital media devices provides a powerful control combination for the consumer. The collaboration with SpeakerCraft enhances the solution both companies' products offer to consumers and dealers. MODE Jukebox, controlled by NevoSL, allows consumers to have a single point to control virtually all their home theatre, A/V equipment while bridging the gap between digital music content stored on the MODE Jukebox. Consumers can play and interact with virtually any song in up to four media zones supported by the MODE Jukebox One or Jukebox Four, all from the palm of their hand.

Both models of the SpeakerCraft MODE Jukebox are now compatible with the NevoSL. On these models, up to four streams of high quality uncompressed audio can be delivered to a conventional multi-room amplifier. A single output SpeakerCraft MODE Jukebox can serve multiple listeners simultaneously by interfacing with selected universal plug and play (UPnP) streaming devices. Using UPnP technology, NevoSL is able to automatically discover media content on the MODE Jukebox and display metadata content on the display for users to browse and select. To stream music, users can simply select what they want to listen to and where they want to enjoy it.

Since its launch, NevoSL has quickly become a favorite of the professional custom installer and has garnered numerous industry awards, including Residential Systems' RESI Award for Best Handheld Controller, the Electronic House "Product of the Year," and CEDIA Australia's Best in Show.

"The compatibility of the SpeakerCraft MODE Jukebox with NevoSL from Universal Electronics makes the user interface easier than ever before," said Jeff Francisco, vice president of product development for SpeakerCraft. "The large display screen and easy to use features of NevoSL provide a powerful addition to the SpeakerCraft MODE Jukebox user experience."

"UEI works hard to make NevoSL compatible with the best multimedia products in the industry," says Ramzi Ammari, vice president of product development for UEI. "The compatibility with the SpeakerCraft MODE Jukebox empowers the user with unprecedented control that is very easy to use and easy for the dealer to install."

About Universal Electronics Inc.

Founded in 1986, Universal Electronics Inc. (UEI) is the global leader in wireless control technology for the connected home. UEI designs, develops, and delivers innovative solutions that enable consumers to control entertainment devices, digital media, and home systems. The company's broad portfolio of patented technologies and database of infrared control software have been adopted by many Fortune 500 companies in the consumer electronics, subscription broadcast, and computing industries. UEI sells and licenses wireless control products through distributors and retailers under the One For All(R) brand name. UEI also delivers complete home control solutions in the professional custom installation market under the brand name Nevo(R), as well as software solutions for digital media control and enjoyment in the consumer and OEM markets under the brand SimpleCenter(TM).

About SpeakerCraft

For over thirty years, SpeakerCraft has been the leading innovator in custom installed loudspeakers and electronics. They invented the first in-wall speaker and later produced literally millions of speakers as an OEM manufacturer for some of the largest speaker companies in the industry. In 1994 they took that experience and launched their own speaker line and quickly became the dominant brand in dealerships across the country. Today they also offer a complete line of complimentary electronics dedicated to the custom installation industry.

This press release contains forward-looking statements that are made pursuant to the Safe-Harbor provisions of the Private Securities Litigation Reform Act of 1995. Words and expressions reflecting something other than historical fact are intended to identify forward-looking statements. These forward-looking statements involve a number of risks and uncertainties, including the timely development, ordering, delivery and market acceptance of products and technologies identified in this release; the Company's continued ability to design products in a fashion that results in its technology being accepted by the companies customers and the end users; the continued importance of the Company's database of codes and other technologies; the continued growth in the markets identified in this release to occur as anticipated by management; and other factors described in the Company's filings with the Securities and Exchange Commission. The actual results that the Company achieves may differ materially from any forward looking statement due to such risks and uncertainties. The Company undertakes no obligations to revise or update any forward-looking statements in order to reflect events or circumstances that may arise after the date of this release.
